spectroscopy instruments. The highly efficient optical cell requires less flow to purge the system, allowing the J505 to run at a lower flow rate minimising sample dilution as found in competing spectroscopy instruments.

Mercury Vapor Analyser

The new Jerome J505 Mercury Vapor Analyser is a portable fluorescence spectroscopy analyser allowing the detection cell to be simpler, smaller, light-weight and more durable than competing

- Flexible data handling
- Programmable auto-sampling mode Choice of 3 units of measurement:

limit alarms

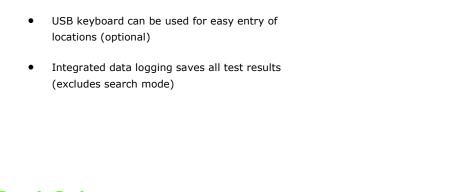

nanograms, micrograms, milligrams Colour display with easy to use menu system

Meets EPA & ATSDR Cleanup Levels,

Choice of two independently adjustable high-

Battery recharges within 3 hours

10+ hrs battery operation

1 to 1000 ppm Calibration and maintenance have been greatly simplified as the digital PID module can be easily removed in hazardous locations for calibration or maintenance RAEGuard 2 & DigiPID have separate certificates but may be used together due to entity parameters Certification ATEX Class I, Div. 1, Groups A B C D T4 - pending RAEGuard 2 Fixed Sensor Head UL/CSA Ex entity parameters

- C €₀₅₇₅ **®** ©IM1/II 1G Ex ia IIC T4 Ex ia I KEMA10ATEX0059 Pi: 1.225W; Vi: 6.13V; Ci: 20.2 μ F; Ii: 1.5A; Li: 1 μ H.

- –Digital interface to fixed head can be safely removed from the fixed head in hazardous locations 0.01 to 99.99 ppm 0.1 to 1000 ppm Pi: 1.225W; Vi: 6.13V; Ci: 20.2μF; li: 1.5A; Li: 1μH
- Using an intelligent processing platform and digital sensor technology, the RAEGuard 2 supports multiple ranges and resolutions. Its explosion-proof stainless steel enclosure makes it suitable for fixed outdoor applications in hazardous environments. The PIDs are designed to allow removal of the digital PID module in hazardous locations, which simplifies calibration and reduces costs of maintenance. Fixed Head Sensor: -Large LCD graphical display -Magnetic key operation -3 programmable alarm relays (High, Low, Fault) -Analog (4-20mA) and Digital (modbus) outputs -Ability to change UI based on what sensor is plugged in. DigiPID sensor module features -Separate gas inlet and outlets
- Easily accessible lamp and sensor for simplified maintenance Increased sensor ranges

Oral Cube Saliva Screen + ALCOHOL for DOA **Revolution in Real-Time Screening** Screens for both drugs and alcohol simultaneously

Known commonly as K2, Spice, Herbal Incense, JWH 018, JWH 073 Bliss, Ganja, herbal smoking tobacco or Kronic,....and various other names, legislation was passed a year ago to make this an illegal substance, - unfortunately as suspected— it is still very much out there -being marketed under other names and readily available.

very little cost. (\$5.00 each)

Per 100 tests
