NEWS UPDATE

Issue 1

On offer this issue:

- ToxiRAE Pro, LEL, PID
- Clan Lab Detection
- OEM Replacement Sensors

To our valued customers & fellow Cantabrians

We can only view with shock and disbelief the absolute devastation caused by last weeks quake, - it is horrendous.

We hope you, your staff, families and loved ones are safe and not suffering loss, injury or damage either personally or commercially in the wake of the earthquake and the many aftershocks that are again rattling the region.

Please be assured our heartfelt thoughts and wishes are with you all at this traumatic time and we can only hope that you are all safe.

Dave, Roy and the team

OEM -Replacement Gas Sensors

(Original Equipment Manufacturers)

Founded in response to an overwhelming demand from gas detection instrument manufacturers, who required superior quality sensor and support, Alphasense have proved to be an enormous success with OEM;s (Original Equipment Manufacturers) worldwide, with most large gas detection instrument manufacturers using them because of their superior performance and support advantages.....[read more](#)

ToxiRAE Pro -(toxic), LEL (combustible) & PID (voc's), -Wireless, -Personal, -Proven

The ToxiRAE Pro is the industry's first and largest family of wireless personal single-gas monitors. ToxiRAE Pro instruments reliably and accurately monitor a full range of common toxic industrial gases (ToxiRAE Pro), volatile organic compounds (ToxiRAE Pro PID), and combustible gases (ToxiRAE Pro LEL).

New Standard for Plant-Wide Deployments

All ToxiRAE Pro instruments have a similar look and feel, user interface, calibration and maintenance routines, share the ProRAE Studio II software for instrument configuration, data download, and exposure analyses, and have many spare parts and accessories in common. This is why customers, who standardize on ToxiRAE Pro enjoy significant time and cost savings on training and maintenance.

ToxiRAE Pro take worker protection to the next level by providing safety professionals wireless access to real-time instrument readings and alarm status from any location for better visibility and faster response

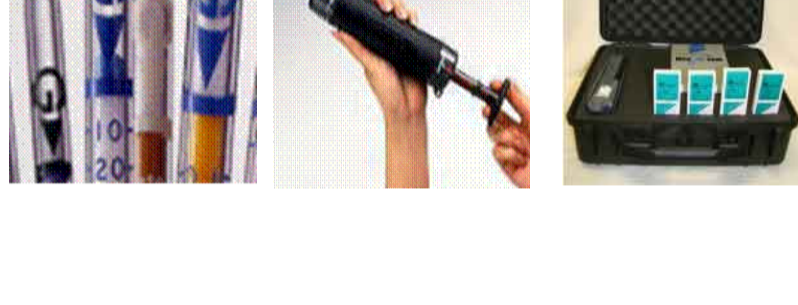

ToxiRAE Pro's intelligent interchangeable sensors store calibration data, so if you need to monitor one gas one day and another the next, swapping the sensors in your ToxiRAE Pro is all that is required.

Clandestine Lab Sampling Kit for illicit drugs

The Clandestine Lab Sampling Kit comprises of a Gastec Sampling Pump and detector tubes, and contains everything needed to analyse gases typically present during the production of methamphetamine and illicit drugs. Our Gastec pre-calibrated detector tubes provide accurate results with lower detection limits than other competitors. The Clandestine Lab Kit measure the following gases, with precise quantities, providing results instantly. It is a portable kit, easy to use, anywhere, anytime and is intrinsically safe.

- Acid Gases
- Ammonia
- Hydrogen Chloride
- Phosgene
- Phosphine

Gastec Chemical Stain Tubes

Gastec gas detector tubes are thin glass tubes with calibration scales printed on them by which you can directly read concentration of the substances (gases and vapors) to be measured. Each tube contains detection reagents that are especially sensitive to the target substance and quickly produces a distinct layer of colour change. Over 545 different tubes are available with APC stocking many of them. Each box contains 10 tubes

Website Update - Ask the Expert ???

We have added a "self explanatory" button to the front page of our website where one may "ask the expert/s" or simply request further information on any of our products. You will also notice we have added a link to our [APC Facebook](#) page.

Calibration Videos : we have direct links from our website to our suppliers calibration videos on [You Tube](#). (RAE Systems, BW, Murco, Honeywell, Geotech). These are a great reference tool in the operation, settings, calibration and bump testing for the many users of our gas detectors.
