# BENEFITS OF APC TECHSAFE

## NEW ZEALAND'S INSTRUMENTATION SPECIALISTS

### Experts in Instrumentation

APC Techsafe is the market leader in the supply, service, calibration, training and support of instrumentation & gas detection equipment in New Zealand with over 30 years experience bringing the latest technologies to market. APC Techsafe provides exclusive wireless gas detection technology solutions to monitor groups of workers in remote locations.

**APC Techsafe is an authorised distributor and service centre for world leading Instrumentation suppliers including Honeywell, RAE Systems, BW Technologies, Geotech, KOBOLD, Alborg, Gastec, CAC Gas and more.**

**Our technical servicing team have unrivalled experience in the maintenance and calibration of the largest range of gas detection equipment in New Zealand.**

### Service & Calibration Nationwide

Gas detectors should be calibrated every six months to twelve months dependant on technology. APC Techsafe's service department offers on site routine calibration, repairs & commissioning of both fixed & portable Gas Detectors. We also offer inspection & servicing of height safety equipment such as harnesses, fall-arresters and retrieval winches. Work is carried out at either of our fully equipped workshops or in our service vehicles by our team of factory trained technicians.

# OUR SERVICES

## There's more to gas detection than simply owning the equipment

Every six months gas detectors should be calibrated and serviced.

APC Techsafe's service department offers onsite routine calibration, repairs & commissioning of both fixed & portable Gas Detectors. We also offer servicing of height safety equipment such as fall-arresters and retrieval winches. Work is carried out at either of our fully equipped workshops or in our service vehicles by our team of factory trained technicians.

### Gas Detection & Instrumentation

APC Techsafe offers routine calibration, repairs and commissioning of both fixed and portable gas detectors. Work is carried out at either our Auckland or Christchurch workshops or in our service vehicles by our team of factory trained technicians. A certificate is issued with each calibrated unit and a full service history is logged in our comprehensive database.

- *Service / Repair / Calibration (Fixed & Portable Gas monitors)*
- *Commissioning New Equipment*

### Height Safety

APC Techsafe inspects harnesses, lanyards and other webbing products, we also offer full servicing of Capital Safety fall arresters, winches and more. A certificate is issued with the return of each item and a full service history is logged in our comprehensive database.

- *Inspection (Webbing products, Harnesses, Lanyards, and more)*
- *Servicing (Fall Arrestors, Retrieval winches, Rope Positioning Devices, Tripods, Davit Arms)*

### Hire

APC Techsafe offers a vast range of gas detectors and height safety equipment for short term hire. Our gas detection range includes multi-gas monitors for personal protection, VOC monitors and landfill gas analysers. Our Height Safety hire offer includes harness kits, fall arresters, winches and tripods.

- *Gas Detection*
- *Height Safety*
