

HOSE TESTING

NZ Safety Blackwoods Technical Solutions Team provide a complete on-site hose inspection, testing, maintenance and repair service.

Our mobile technicians are highly experienced and are fully equipped with the latest testing equipment and hose data management system (InfoChip TESSALink). We have a fully equipped hose assembly and test workshop which is staffed by hose assemblers and testers with long standing experience in the hose and fittings industry.

On Site Services Include

- Pressure or vacuum testing
- Electrical continuity testing
- Hose Repairs
- Site Surveys with asset identification tagging
- Inspection and Certification

Comprehensive hose management solution

We offer a comprehensive hose asset management solution paired with a world class asset management system InfoChip TESSALink. This includes scheduled visits to your site for testing and repairs tailored to your needs.

All your hose assets are added to our InfoChip TESSALink database including test results and certification. Your hoses are inspected and tested at regular intervals to make sure they are safe to use and replacements or repairs are promptly carried out avoiding costly downtime and accidents.
