

ProRAE Guardian CloudServer

Real-time gas & radiation sensor data available anywhere and anytime

ProRAE Guardian CloudServer service simplifies sharing of instrument data with multiple remote sites in real time and empowers decision-makers with critical information in emergency response situations. It also enables geographically dispersed teams to coordinate their responses while simultaneously viewing the same situational data, all in real-time.

The service aggregates instrument data from multiple installations in real time and makes it available for viewing anywhere in the world with no extra hardware or maintenance costs. The service is professionally hosted and maintained by RAE Systems in a fail-safe environment with high availability, which ensures uninterrupted service 24x7. It also takes away the setup and configuration tasks from end users and allows them to focus on their core jobs.

ProRAE Guardian CloudServer is a subscription-based service that offers multiple-year terms with increasing levels of discounts.

- **Easy real-time data sharing for joint operations**
- **Improved productivity with central monitoring of real-time data from multiple locations**
- **No extra hardware and ongoing maintenance cost**
- **No setup and configuration**
- **Latest version of service software always at your fingertips. RAE Systems manages all upgrades at no extra cost to you**
- **No or minimal IT involvement**
