PAD

- Span: 0.75 ... 15 mbar up to 4.137 ... 413.7 bar
- Static pressure: max. 310 bar
- t_{max}: +120 °C
- Process connection: ¼" NPT, ½" NPT, various diaphragm seals on request
- Material: stainless steel, HAST-C, Tantalum, Monel
- Various output: 4 ... 20 mA, frequency output
- Sensor input: differential-, gauge-, absolute pressure
- Digital communication with HART® protocol
- ATEX-approval

Description

The Kobold Differential Pressure Transmitter model PAD is a micro processor-based high performance transmitter, which has flexible pressure calibration and output, automatic compensation of ambient temperature and process variable, configuration of various parameters, communication with HART® protocol. The application is very various, as measuring pressure, flow and level by application method. All data of sensor is to be input, modified and stored in EEPROM.

As an option the Kobold Pressure Transmitter is also available as a flow meter. This flowmeter model PAD-F has added the totalizing function in the PAD transmitter. So it is available to check the flow rate and totalizing flow. It measures the flow rate by using differential pressure without compensation of temperature and static pressure. The shape of the PAD-F is the same as the standard device and it is only the terminal block which is different since there are two more terminals for the read-out of the pulse output.

Features

Superior performance

- High reference accuracy:
  ±0.075 % of calibrated span
  (optional: ±0.04 % of calibrated span)
- Long-term stability (0.125 % URL for 3 years)
- High rangeability (100:1) for range 4-0

Flexibility

- Data configuration with HART® configurator
- Zero point adjustment

Reliability

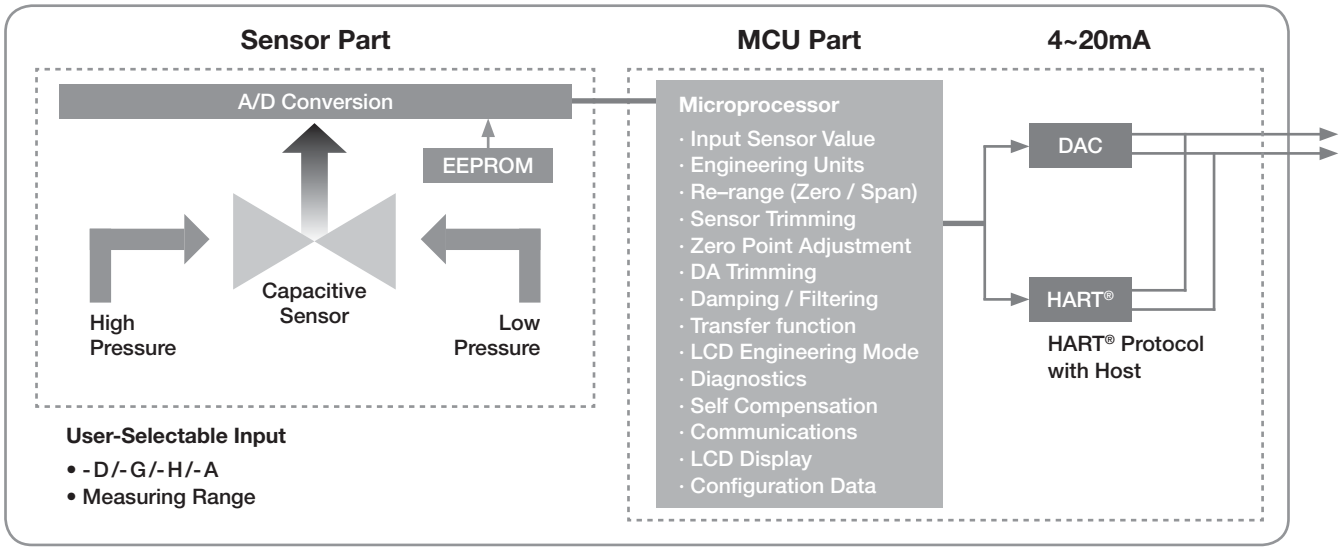
- Continuous self-diagnostic function
- Automatic ambient temperature compensation
- EEPROM write protection
- Fail-mode process function
- CE EMC conformity standards (EN 50081-2, EN 50082-2)

Transmitter Description

Electronics module

The Electronics module consists of a circuit board sealed in an enclosure. There are a MCU module. an analog module, a LCD module and a terminal module in a transmitter. The MCU module acquires the digital value from the analog module and applies correction coefficients selected from EEPROM. The output section of the MCU module converts the digital signal to a 4…20 mA output. The MCU module communicates with the HART®-based configurator or control systems such as DCS. The Power section of MCU module has a DC-to-DC power conversion circuit and an input/output isolation circuit. The LCD module plugs into the MCU module and displays the digital output in a user-configured unit.

Functional Block Diagram



2/03 - 2016

Sensor Inputs

The models PAD - D, - G, and - H are available in a differential pressure sensor of a capacitance type. The capacitance pressure sensor measures differential and gauge pressure and is commonly used in flow and level applications. Both sides in the capacitance sensor transmit process pressure from the process isolators to the sensor. The model PAD-A is also available in an absolute pressure sensor of a piezoresistive type and measures absolute pressure. The sensor module converts the capacitance or the resistance to the digital value. The MCU module calculates the process pressure based on the digital value.

The sensor modules include the following features

- 0.075 % accuracy
- The software of the transmitter compensates thermal effects, improving performance.
- Precise Input Compensation during operation is achieved with temperature and pressure correction coefficients that are characterized over the range of the transmitter and stored in the sensor module EEPROM memory.
- EEPROM stores sensor information and correction coeficients separately from MCU module, allowing an easy repair, reconfiguration and replacement.

Basic Setups

Following settings can be easily configured from any host that support the HART® protocol:

- Operational parameters
- 4-20 mA points (zero/span)
- Engineering units
- Damping time: 0.25...60 sec
- Tag: 8 alphanumeric characters
- Descriptor: 16 characters
- Message: 32 characters
- Date: day/month/year

Calibration and Trimming

- Lower/Upper range (zero/span)
- Sensor zero trimming
- Zero point adjustment
- DAC output trimming
- Transfer function
- Self-compensation

Self-diagnosis and others

- CPU & Analog Module Fault Detection
- Communication Error
- Fail-mode handling
- LCD indication
- Temperature measurement of sensor module

Multi Planar Process Connection

Conventionally, in the case where the pressure transmitter should be vertically installed irrespective of the orientation of the process connection lines, modified flanges (as shown above) are required in addition to the basic flanges. Multiplanar pressure transmitter have been made in an effort to solve the problems occurring in the related art, and an object of this multi planar is to provide a pressure transmitter, capable of being vertically installed without separate adaptor or various types of brackets regardless of the position of the process connection lines.

Process Connection via Diaphragm Seals

For the connection of the differential pressure transmitter model PAD to all different process connections, diverse diaphragm seal versions are necessary.They can be connected to the differential pressure transmitter by direct mounting or via a capillary tube. Depending on the application different combinations of diaphragm seals, capillary tubes and fill fluids are possible. To clarify those possibilities, the special connections via diaphragm seals are always to be requested separately to the differential pressure transmitter.

Technical Details

Measuring principle: Capacitance sensor (PAD-D, -F, -G, -H)
Piezo-resistive (PAD-A)

Measuring span: 0.75…15 mbar up to 4.137…413.70 bar (depending on instrument version)
Zero and span values can be set anywhere within the range limits
Span must be greater than or equal to the minimum span

Accuracy:
- for range 2
±0.25 % of span for
0.1 URL ≤ span ≤ URL
±[0.24 + (0.008 x (URL/span)) % of span for 0.05 URL ≤ span ≤0.1 URL
- for range 3
±0.075 % of span for
0.1 URL ≤ span ≤ URL
±[0.25 + (0.005 x (URL/span))] % of span for 0.02 URL ≤ span ≤0.1 URL
- for range 4 to 0
±0.075 % of span for
0.1 URL ≤ span ≤ URL
±[0.025+(0.005x(URL/span))] % of span for 0.01 URL ≤ span ≤0.1 URL

Turndown ratio: ranges 4 ~ 0 = 100 : 1
range 3 = 50 : 1
range 2 = 20 : 1

Process temperature: -40 °C…+120 °C
(Approval codes may effect limits. Max. ambiant temperature at LCD = +80 C.)

Ambient temperature: -30 °C…+80 °C

Ambient temperature effect: ± (0.019% URL + 0.125% span) / 28 °C

Storage temperature: -40 °C…+85 °C (without condensing)

Humidity limit: 5 %...100 % RH

Pressure limits (with silicone oil)

(valid for stand-alone intruments only without assembled diaphragm seals)

Model D and G: 0…137.9 bar (for range 2...8)
Model G: 0…400 bar (for range 9)
0...750 bar (for range 0)
Model H: 0…310 bar (for range 4...7)
Model A: 0…5 bar (for range 4)
0…30 bar (for range 5)
0…52 bar (for range 6)

• Burst pressure

Model D, G and H: 689 bar
800 bar (for model G, range 0)
Model A: 10 bar (for range 4)
40 bar (for range 5)
70 bar (for range 6)

Wetted materials

Isolating diaphragms: 1.4404 (316L st. st), Monel, Tantalum, HAST-C
Drain/Vent valves: 1.4401 (316 st.st)
Flanges and adapters: 1.4401 (316 st.st)
O-ring: FPM, PTFE as an option

Non-wetted materials

Fill fluid: silicone oil or inert fill
Bolts: stainless steel
Electronics housing: aluminum, or 316L st.st. (option) flameproof (Ex d) and waterproof (IP67)
Cover o-ring: NBR
Paint: epoxy-polyester or polyurethane
Mounting bracket: for 2-inch pipe, 1.4301 (304 sst), with 1.4301(304 sst) U-bolt
Nameplate: 1.4301 (304 sst)
Process connections: ¼" NPT with 54.0 mm centre distance for standard flanges
½" NPT with process adapter (option)
Mounting position: upright (process connection more flexible by using multi-planar flange)
Display: 5 Digit LCD
Power supply: 12…45 V_{DC} -operation
17.5…45 V_{DC} -HART® communication
Maximum load: 250 Ω at 17.5 V_{DC}
550 Ω at 24 V_{DC}
max. loop resistance = $\frac{(U - 12\ V_{DC})}{0.022\ A}$
Loop load: 0...1500 Ω - operation
250...550 Ω - HART® communication
Failure mode: fail high: current ≥ 21.1 mA
fail low: current ≤ 3.78 mA
Electrical connection: ½" NPT conduit with M4 screw terminals (G½ option)
Output:
- two wire 4…20 mA, userconfigurable for linear or square root output, digital process value superimposed on 4…20 mA signal, available to any host that conforms to the HART® protocol
- frequency output for flowmeter model PAD-F with pulse width of 10, 50 or 100 ms (selectable, negative going pulse)
output type: open collector, 30 V, 500 mA max.
pulse rate: 49 pulses/sec max.

Turn-On time: 3 seconds
Protection: IP 67 for Standard (code S)
Weight: 3.9 kg (excluding options) standard
0…750 bar (for range 0)
5.35 kg (st. st. housing - excl. options)
ATEX approval: Ⓔx II 2G Exd IIC T6 ... T5 (option)

2/03 - 2016

Order Details (Example: **PAD-D EE 2 S 2 N S0 0**)

Model	Version	Material Body/vent plug/ diaphragm	Calibrated span (Measuring range limits for PAD-D, -F, -G and -H in separate table)
PAD-	**D** = differential pressure transmitter (static pressure 138 bar) **F**[1] = differential pressure transmitter with pulse output and totalizer especially for flow measurement **H** = differential pressure transmitter for high line pressure (static pressure 310 bar) **G** = gauge pressure transmitter **A** = absolute pressure transmitter	**EE** = 316 st. steel / 316 st. steel / 316L st. steel **EH** = 316 st. steel / 316 st. steel / HAST-C **EM** = 316 st. steel / 316 st. steel / Monel **ET** = 316 st. steel / 316 st. steel / Tantalum	**Calibrated span for PAD-D, -F, -G, -H** **2**[3] = 0.75 ... 15 mbar **3** = 1.5 ... 75 mbar **4** = 3.73 ... 373 mbar **5** = 18.65 mbar ... 1.865 bar **6** = 69 mbar ... 6.9 bar **7** = 206.8 mbar ... 20.68 bar **8**[3] = 689.5 mbar ... 68.95 bar **9**[3] [4] = 2.068 ... 206.80 bar **0**[3][4] = 4.137 ... 413.70 bar **Calibrated span for PAD-A** **4** = 25 mbar ... 2.5 bar **5** = 150 mbar ... 15 bar **6** = 250 mbar ... 25 bar

Order Details (continued):

Filling liquid	Process connection	Electrical connection	Approvals for hazardous applications	Options
S = silicone **I** = inert filling liquid	**2** = ¼" NPT female (standard) **X**[2] = special	**N** = ½" NPT epoxy-polyester painted aluminium **G** = G ½ epoxy-polyester painted aluminium **X**[2] = special	**S0** = standard (waterproof IP67) **F0** = ATEX, flameproof, Ex d	**0** = without **C** = engineering unit (must be chosen when using the differential transmitter as a flowmeter) **D** = teflon o-ring (wetted part) **E** = oil free finish **F** = side vent / drain bottom **G** = side vent / drain top **H** = multi-planar process connection **M** = housing in stainless steel **N**[5] = mounting of PAD onto diaphragm seal **Y**[2] = special calibration range

[1] Specify flow rate engineering unit, Δ p and flow rate at URV (Upper Range Value), Δ p and flow rate (generally '0') at LRV (Lower Range Value) pulse scale (choose only one value from 0.001, 0.01, 0.1, 1, 10, 100, 1000, 10000 m³/pulse) and pulse width (choose only one value from 10 ms, 50 ms, 100 ms), while ordering so that max. duty cycle is 49 pulses/sec

[2] Code X not available for ATEX. Order code X and Y must be specified in writing

[3] Not for PAD-H

[4] Not for PAD-D and PAD-F

[5] Diaphragm seal model and application data to be speicified in clear text. Application Index on the last two pages of this data sheet to be filled out. For summary of diaphragm seal models and possible ranges, see following page 11 onwards. For dimensional details see DRM data sheet.

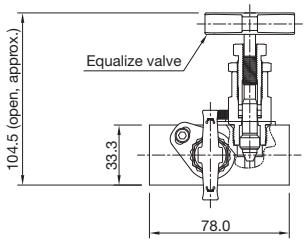
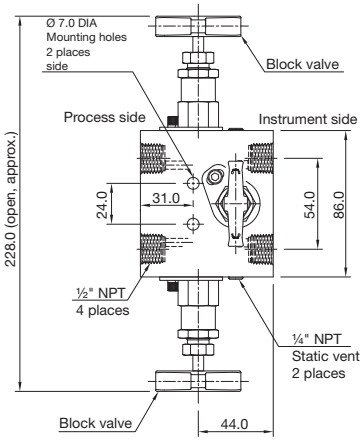
Manifold valves (remote mount)

Technical Details

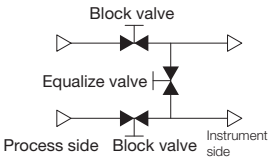
Material: 316SS body with PTFE packing
Connection and size: ½" NPT (F)
Pressure rating: 6000 psig at 38 °C (≈410 bar)
Temperature range: -54 °C ... +232 °C

3-way manifold valve

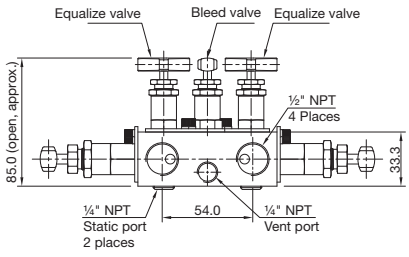


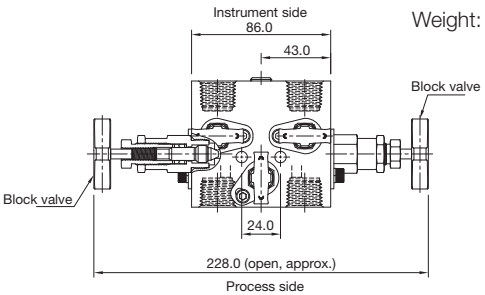


Weight: 2 kg

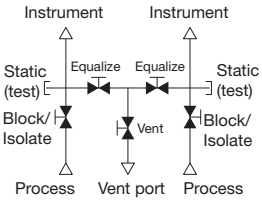


5-way manifold valve





Weight: 2.2 kg



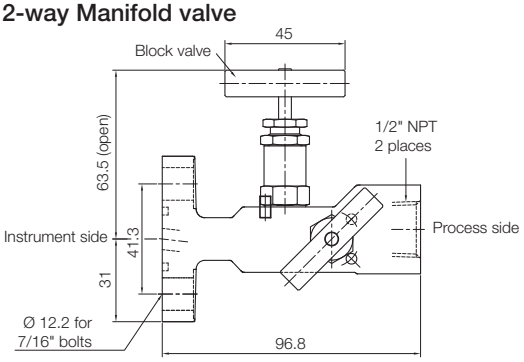
Manifold valves (Direct mount)

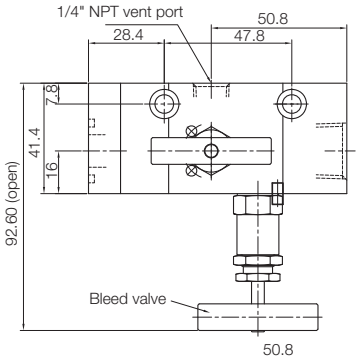
Technical Details

Material: 316SS body with PTFE packing
Connection and size: ½" NPT (F) to flange

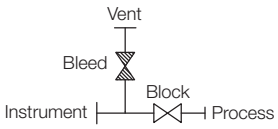
Pressure rating: 3000 psig at 232 °C (≈210 bar)
Temperature range: -54 °C ... +232 °C

2-way Manifold valve





Weight: 1.6 kg



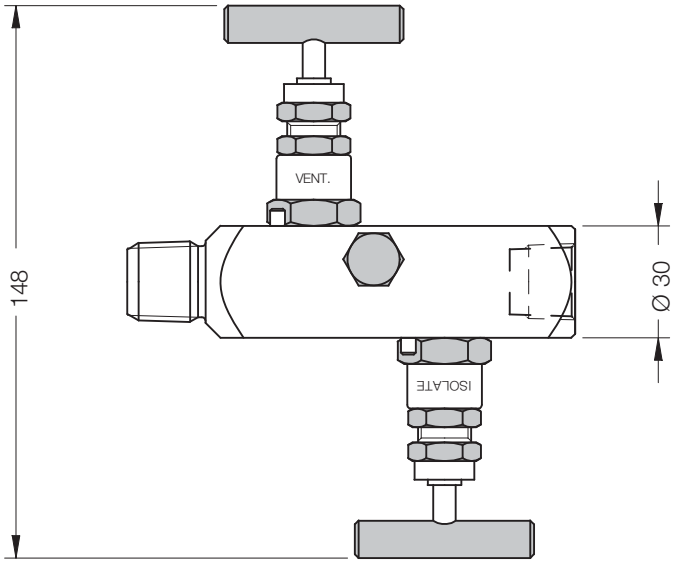
Manifold valves (Direct mount, machined)

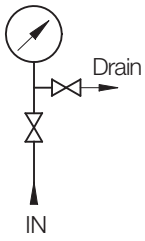
Technical Details

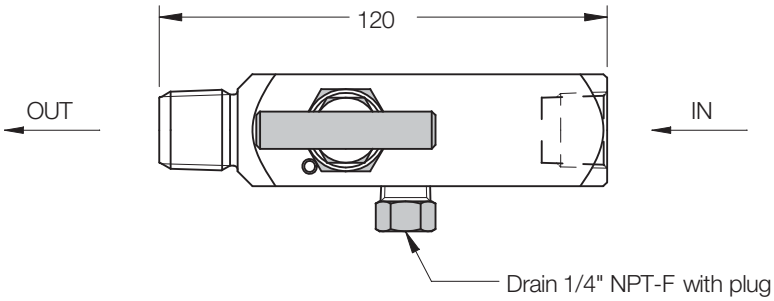
Material: AISI 316L
Pressure rating: 6 000 psi
Temperature range: -73 °C ... +210 °C (PTFE packing), standard
-54 °C ... +510 °C (GRAPHOIL packing), on request
Weight: 0.88 kg

2-way Manifold valve

(inlet: ½" NPT female / outlet: ½" NPT male)

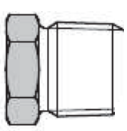






Included accessories

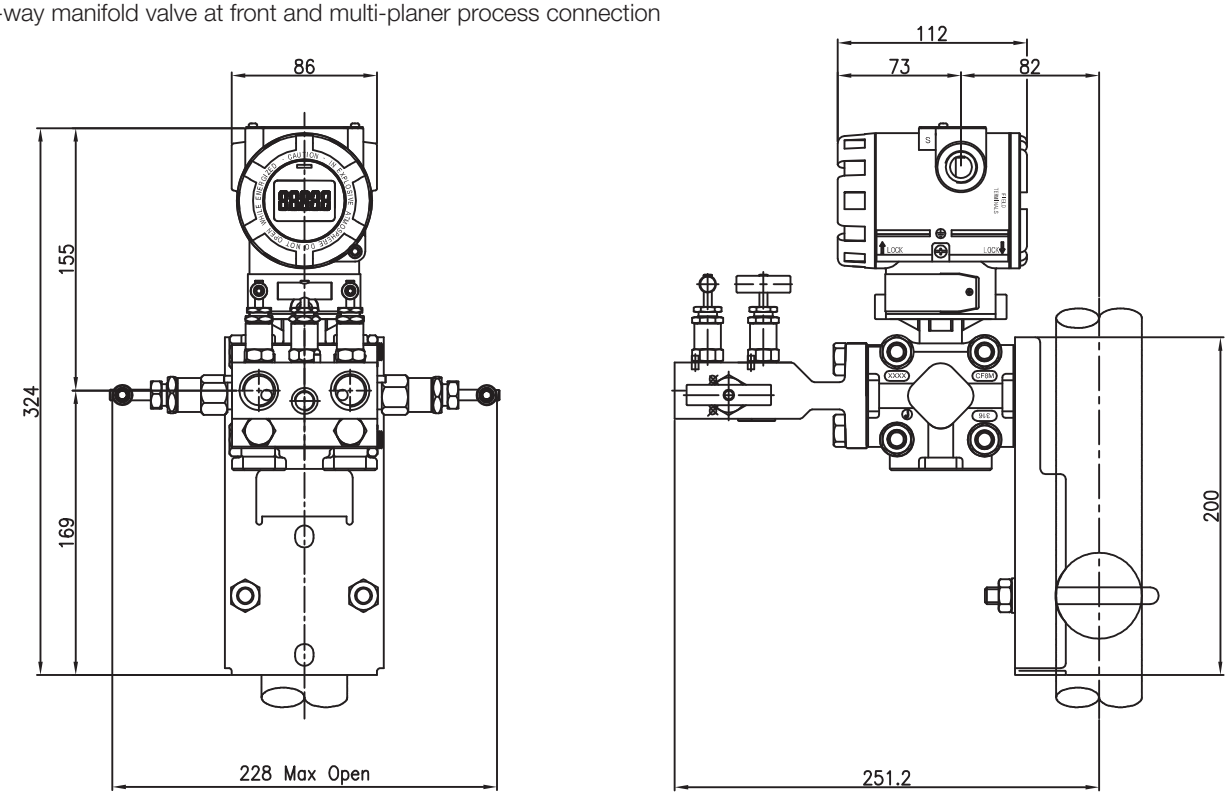
Plug



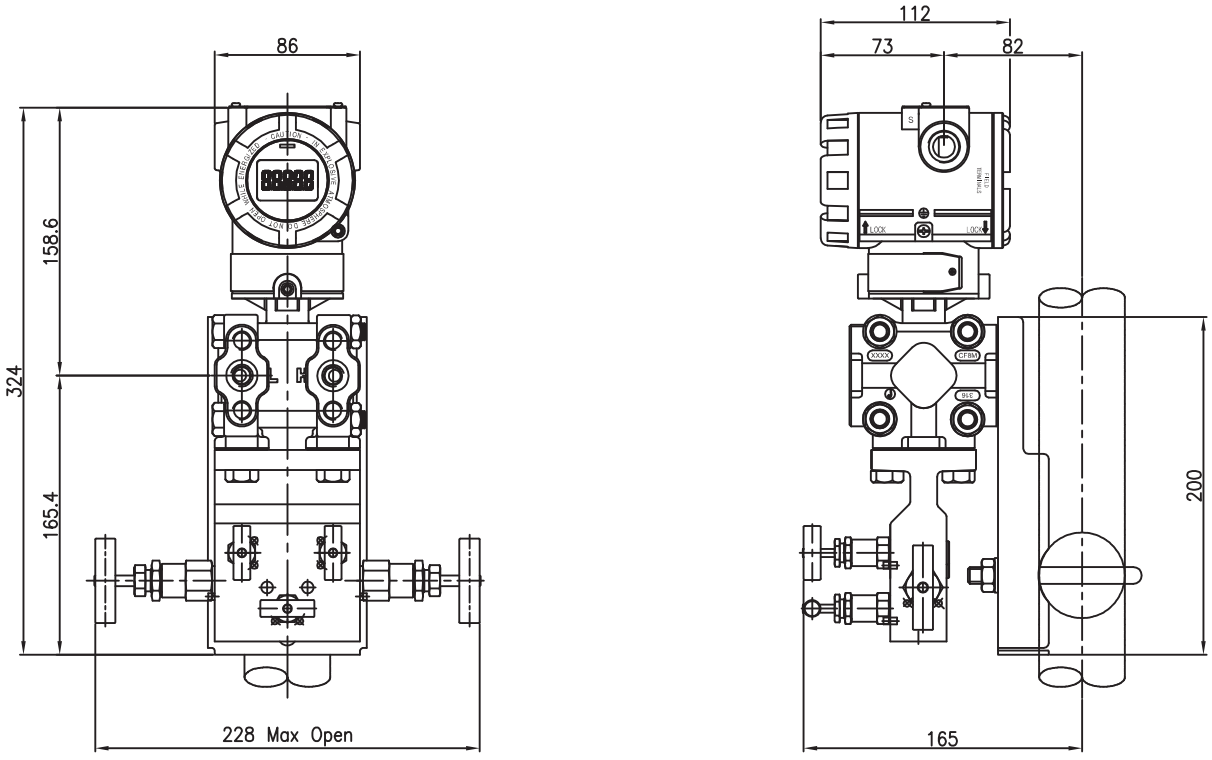
Order Code: V-2003CDADABAA (PTFE packing)

Typical bracket mounted installations with 5-way manifold valve (direct mounting)

5-way manifold valve at front and multi-planer process connection



5-way manifold valve at bottom and multi-planer process connection



2/03 - 2016

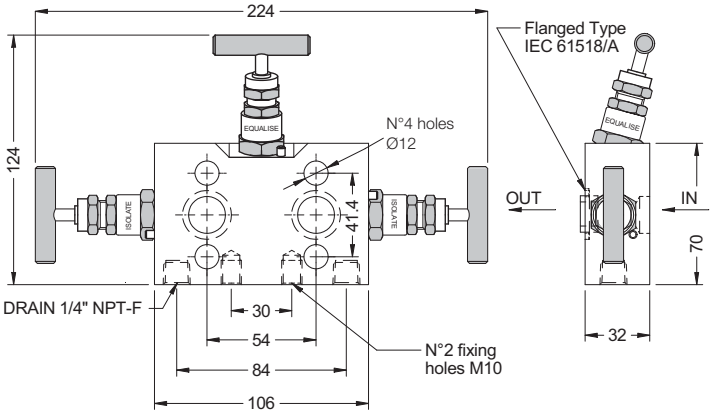
Manifold valves (Direct mount, machined)

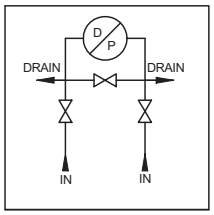
Technical Details

Material: AISI 316L
Pressure rating: 6000 psi
Temperature range: -73 °C ... +210 °C (PTFE packing), standard
-54 °C ... +510 °C (GRAPHOIL packing), on request
Weight: 2.17 kg

3-way Manifold valve

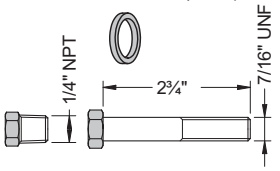
(inlet: flanged / outlet: flanged according to IEC 61518 Type B / Type A)





Included accessories:

4 carbon steel screws (stainless steel on request)
2 plugs
2 PTFE gaskets



Order Code: V-3151CHHHIBAA (PTFE packing)

Possible ways of mounting 3-way manifold valve with PAD

Description	Process connection	Illustration
Valve mounted upside down on front side of PAD	Flanged according to IEC 61518 type A	
Valve mounted upside down on front side of PAD including oval flange adapter model ZUB-PAD-OVF	½" NPT female	
Valve mounted on front side of PAD, head of PAD rotated by 90° clockwise	Flanged according to IEC 61518 type A	
Valve mounted on front side of PAD including oval flange adapter model ZUB-PAD-OVF, head of PAD rotated by 90° clockwise	½" NPT female	

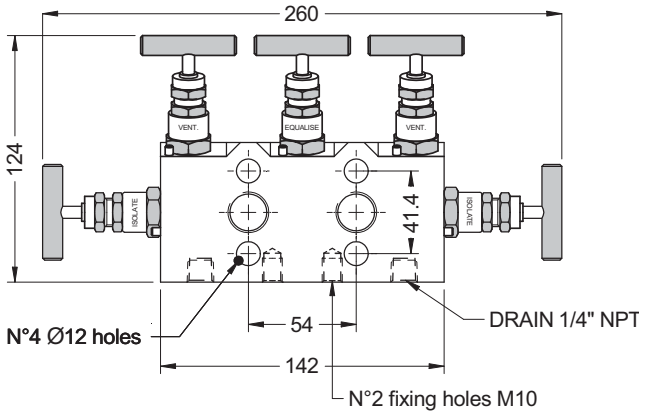
Manifold valves (Direct mount, machined)

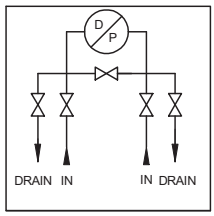
Technical Details

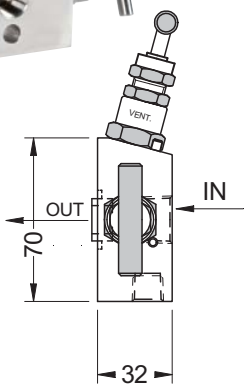
Material: AISI 316L
Pressure rating: 6000 psi
Temperature range: -73 °C ... +210 °C (PTFE packing), standard
-54 °C ... +510 °C (GRAPHOIL packing), on request
Weight: 2.80 kg

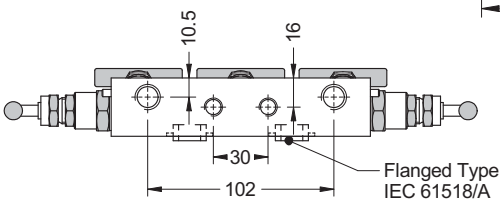
5-way Manifold valve

(inlet: ½" NPT / outlet: flanged according to IEC 61518 Type A)



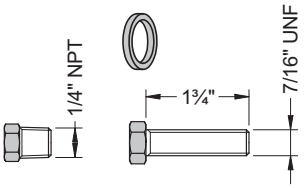






Included accessories:

4 carbon steel screws (stainless steel on request)
2 plugs
2 PTFE gaskets



Order Code: V-5050CDAHIBAA (PTFE packing)

Possible ways of mounting 5-way manifold valve with PAD

Description	Process connection	Illustration
Valve mounted upside down on front side of PAD	½" NPT female	
Valve mounted on front side of PAD after rotating the head of PAD by 90° clockwise	½" NPT female	

Manifold valves (Direct mount, forged)

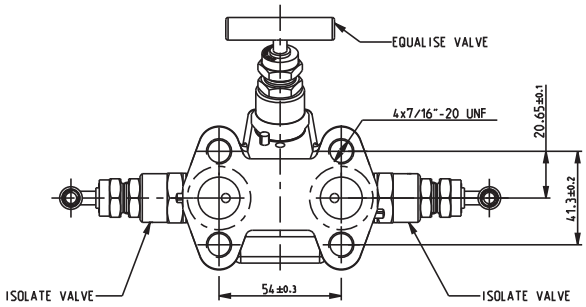
Technical Details

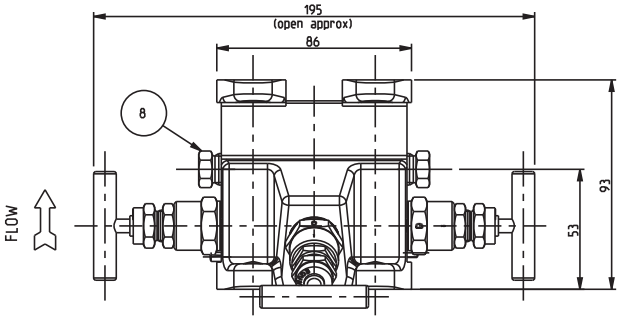
Material: stainless steel 316L
Pressure rating: 6 000 psi
Temperature range: -73 °C ... +210 °C (PTFE packing), standard
-54 °C ... +510 °C (GRAPHOIL packing), on request

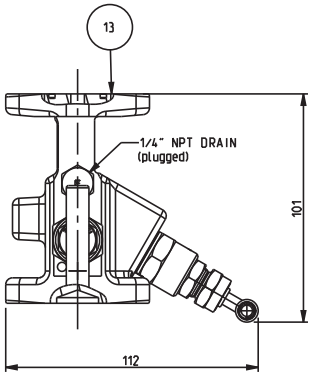
Weight: 2.25 kg

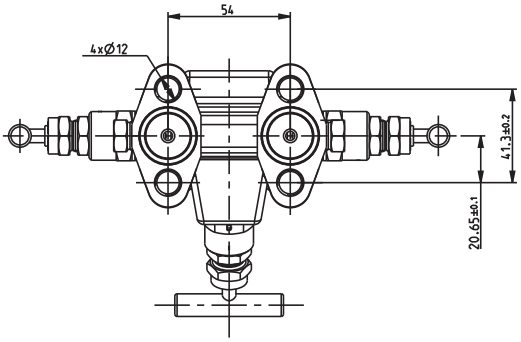
3-way Manifold valve

(inlet: flanged oval/ outlet: flanged according to IEC 61518 Type B)



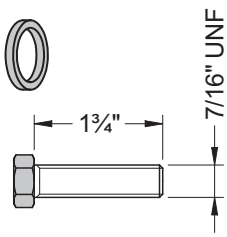






Included accessories:

4 carbon steel screws (stainless steel on request)
2 PTFE gaskets



Order Code: V-3454CHHHHBAA (PTFE packing)

Diaphragm Seal Models (Remote assembly)*

(Standard device without additional options (e.g. coatings, special materials etc.).
For dimensions/technical data, see DRM data sheet. Accuracy: 0.075% of calibrated span + influence of seal).
Over and under ranges of the min./max. span might be possible, but must be verified by Kobold for each application.
The indicated min./max. spans do not consider any coating of diaphragm seals. For additional information contact Kobold.

Application Index

Please fill out the following Application Data Sheet while inquiring/ordering model PAD assembled with diaphragm seal model DRM

Order/ Inquiry Ref./ Item No.

Pressure Transmitter (Model, Calibration range)	
Diaphragm Seal (Model, Size Code)	
Diaphragm material of DRM (wetted part)	
Process connection material of DRM (wetted part)	

Medium:		
Operating density		**g/cm²**
Operating viscosity		**cSt**

Temperature:	**nominal**	**minimal**	**maximal**	
Medium temperature:				**°C/°F**
Ambient temperature:				**°C/°F**
Rinsing temperature diaphragm seal				**°C/°F**
Rinsing temperature capillary				**°C/°F**

Pressure specification:		**Value**	
1.1) Operating pressure static	or 1.2		**bar/psi**
1.2) Operating pressure dynamic min + max	or 1.3		**bar/psi**
1.3) Operating pressure as frequency in Hz			**Hz**
2.) max. negative pressure			
3.) max. over pressure			
4.1) Display damping: without / light / middle / strong	or 4.2		
4.2) Pressure decrease with time + range			

Arrangement with rectangular Connection Rod (Fig. 1):		
1.) Connecting Rod Length (ΔL = min. 150 mm/max. 500 mm) at HP port 'H'		**mm**

Arrangement with capillary:		
1.) Diaphragm seal needed on both ports	**Yes**	
	No (diaphragm seal connected to high pressure port 'H')	
2.) If answer to 1) is YES, same model diaphragm seal on both ports	**Yes**	
	No	
3.) If answer to 2) is NO, specify DRM models at each port	DRM model at high pressure port 'H'	
	DRM model at low pressure port 'L'

Application Index (suite)
Order/ Inquiry Ref./ Item No.

Arrangement with capillary (suite)**:**		
4.) Orientation of diaphragm seals (Tick mark the appropriate box, see Fig. 2)	Diaphragm seal at port 'H', sealing surface facing DOWN	
	Diaphragm seal at port 'H', sealing surface facing RIGHT	
	Diaphragm seal at port 'H', sealing surface facing LEFT	
	Diaphragm seal at port 'H', sealing surface facing UP	
	Diaphragm seal at port 'H', special orientation, provide sketch	
	Diaphragm seal at port 'L', sealing surface facing DOWN	
	Diaphragm seal at port 'L', sealing surface facing RIGHT	
	Diaphragm seal at port 'L', sealing surface facing LEFT	
	Diaphragm seal at port 'L', sealing surface facing UP	
	Diaphragm seal at port 'L', special orientation, provide sketch	

Capillary:		
length in 'mm' at port 'H' (if other units, please specify)		mm
length in 'mm' at port 'L' (if other units, please specify)		mm
protection hose required (yes/no)		

Height Adjustment:			
1.) Factory calibration for height adjustment required	No		
	Yes, choose from the following option(s) 2 … 5		
2.) PAD higher than DRM at port 'H' (Fig. 2 or 3), specify +Δh(1)			mm
3.) PAD lower than DRM at port 'H' (Fig. 2 or 3), specify -Δh(1)			mm
Following options "4" and "5" not valid while ordering PAD-G…			
4.) PAD higher than DRM at port 'L' (Fig. 2), specify +Δh(2)			mm
5.) PAD lower than DRM at port 'L' (Fig. 2), specify -Δh(2)			mm

Options: Extended diaphragm seal at both ports (see Fig. '1' or Fig. '3' for dimension R_L, tick only if option needed)		
No (extended diaphragm seal only at port 'H')		
If No, length 'R_L' of extended diaphragm seal at port 'H'		
Yes		
If Yes, length 'R_L' of extended diaphragm seal at port 'H'		mm
If Yes, length 'R_L' of extended diaphragm seal at port 'L'		mm

Filling liquid (Tick mark the desired box)	
Glycerine oil (silicone free, food grade) for Operation temperature (-10 … +80 °C)	
Paraffine oil (silicone free, food grade) for Operation temperature (-10 … +120 °C)	
Silicone oil for Operation temperature (-40 … +200 °C)	
Silicone oil for Operation temperature (-20 … +350 °C)	
Silicone oil for Operation temperature (-20 … +400 °C)
